## **Grey House Publishing Announces the Publication of *Canadian Environmental Resource Guide, 2016-2017***

Grey House Publishing Canada is happy to announce the publication of the **21st Edition** of the *Canadian Environmental Resource Guide*. We are proud to release a text that has been recognized as Canada's most complete and detailed listing of environmental associations and organizations, government regulators and purchasing groups, product and service companies, special libraries and much more.

This updated edition of the *Canadian Environmental Resource Guide* provides **over 10,000 ways to access information** on every aspect of the environmental industry in unparalleled detail. Furthermore, we have made several major updates to the 2016/17 edition, including a new, separate section on Major Environmental Companies and municipal government information. All profiles include current contact information and key executives, plus valuable details such as number of employees, financial data, municipal waste & water management, additional services and more. Four indexes provided and grouped at the end of the book for quick and easy navigation.

The **Environmental Update 2016** section offers a current look at the Canadian environmental picture. With revised and expanded *Chronology, Statistics and more*, Update 2016 includes Ranking Charts from Environmental Performance Indicators that show how Canada compares with the rest of the world in significant environmental issues. It also includes new, revised or most recent available charts, tables, statistics, reports and more covering every aspect of Canada's environment: Air Quality; Waste; Water Quality & Quantity; Biodiversity & Conservation; Natural Resource Management; and Climate Change & Energy Efficiency. Over 30 biographies of prominent Canadian environmentalists are also included, along with Abbreviations of environmental terms, and an updated and expanded list of *Trade Show, Conference & Seminar* profiles.

The **Major Environmental Companies & Environmental Products & Services Buyer's Guide** includes thousands of manufactures and service providers that offer products that deal with environmental issues from

Absorbents to Wood Recycling, from Agriculture Management to Wind Energy Conversion. Company profiles are current and comprehensive, with descriptions, corporate details and key executives. The newly added Major Environmental Companies section details approximately 700 top Canadian companies engaged in environmental-related activities, in areas such as Agriculture, Construction, Forestry, Mining, Oil & Gas, and more.

The **Environmental Government Listings** are arranged in three subsections, starting with updated information on *Intergovernmental Offices & Councils* and *Environmental Trade Representatives Abroad*. Following that are the *Municipal* listings, including Counties, Major Municipalities, Other Municipalities, and Waste & Water Commission Authorities, among other categories. Listings in this subsection include detailed information on population and number of households, water and waste treatment, landfill statistics and special by-laws and bans, as well as key environmental contacts for each municipality. Updated *Municipal Ranking Tables* precede the directory listings. This valuable information is further accessed by four indexes: **Subject, Geographic, Executive** (approximately 10,700 names), and **ISO**.

The 2016-2017 *Canadian Environmental Resource Guide* is also available as part of Grey House Publishing Canada's Canada Information Resource Centre (CIRC) on the web ([www.greyhouse.ca](http://www.greyhouse.ca)), where subscribers have full access to this rich database. In total, subscribers have access to more than 17,000 organization profiles and over 25,000 contacts. Trial subscriptions are available to the CIRC database by calling 866-433-4739. Electronic versions of this text are also available on all major e-Book platforms.

This thoroughly researched and comprehensive volume is an asset to anyone with an interest in the environment, especially those doing business in the environmental industry, those looking for contacts in environment-related government offices, and activists or scholars involved in environmental studies and political action. Listings included in the 2016-2017 *Canadian Environmental Resource Guide* offer a great deal of information valuable not only to Canadians attuned to environmental needs and causes, but also to their counterparts in the United States.

*Canadian Environmental Resource Guide* is available in print, by subscription and online via Grey House Publishing Canada at [www.greyhouse.ca](http://www.greyhouse.ca). So don't delay! Visit our website or call us now to take advantage of the most comprehensive picture of the Canadian environmental sector available.
