

---

# Introduction

---

This is the 26th edition of the *Canadian Environmental Resource Guide*, previously the *Canadian Environmental Directory*. It is the fifteenth edition to be published by Grey House Publishing Canada, and the third in partnership with Actual Media.

As its name indicates, this reference book is much more than a directory. The print edition includes colour maps, charts, rankings, recent events, descriptions of environmental issues and prominent researchers; valuable profiles of companies offering environmental products and services, including Major Environmental Companies; a section detailing law firms with environmental practice areas; municipal government information; and newly re-added environmental associations—over 12,000 ways to access information and knowledge about the environment in Canada. The wealth of information in this annual resource guide—essential for any business or agency with an interest in a wide spectrum of environmental issues—is arranged into three main sections and 21 subsections. All profiles include current contact information and key executives, plus valuable details such as number of employees, financial data, municipal waste & water management, additional services and more. Four indexes are provided and grouped at the end of the book for quick and easy navigation.

Buyers of the book also get access to even more extensive information online via **Canada's Information Resource Centre (CIRC)**, including associations, libraries, and federal/provincial government departments and agencies.

## Print Edition:

### Environmental Update 2024

This section offers a current look at the Canadian environmental picture. With revised and expanded **Chronology**, **Statistics** and more, Update 2024 includes Ranking Charts from Environmental Performance Indicators that show how Canada compares with the rest of the world in significant environmental issues. It also includes new, revised or most recently available charts, tables, statistics, reports and more covering every aspect of Canada's environment: Air Quality; Waste; Water Quality & Quantity; Biodiversity & Conservation; Natural Resource Management; and Climate Change & Energy Efficiency. You'll also find 49 **Biographies** of prominent Canadian environmentalists, Abbreviations of environmental terms, and updated and expanded **Trade Show, Conference & Seminar** profiles.

### Industry Resources

**The Major Environmental Companies** subsection details approximately 550 top Canadian companies engaged in environmental-related activities, in areas such as Agriculture, Construction, Forestry, Mining, Oil & Gas and more. The thousands of manufacturers and service providers listed in the **Products and Services Buyer's Guide** offer products that deal with environmental issues from Absorbents to Wood Recycling, from

Agriculture Management to Wind Energy Conversion. Company profiles are current and comprehensive, with descriptions, corporate details and key executives. The **Law Firms** section lists firms across Canada with an interest in environmental law, including details on the lawyers' areas of specialty. Rounding out this section are **Associations/Organizations**, detailing groups engaged in all areas of environmental activity in Canada.

### Environmental Government Listings

Arranged in three subsections, this section starts with updated information on **Intergovernmental Offices & Councils** and **Environmental Trade Representatives Abroad**. Following that are the **Municipal** listings, including Counties, Major Municipalities, Other Municipalities and Waste & Water Commission Authorities, among other categories. Listings in this subsection include detailed information on population and number of households, water and waste treatment, landfill statistics and special by-laws and bans, as well as key environmental contacts for each municipality. Updated **Municipal Ranking Tables** precede the directory listings.

### Indexes

This valuable information is further accessed by four indexes: **Subject**, **Geographic**, **Executive**, and **ISO**.

### Online Content:

#### Additional Environmental Resources

In addition to the content found in the print edition, the *Canadian Environmental Resource Guide* online gives you access to 750 **Special Libraries & Resource Centres**, with details such as contact information, key executives, and descriptions of the services provided.

#### Federal and Provincial Government Listings

Environmental government information at both the **Federal** and **Provincial** levels is available exclusively online, and includes in-depth listings of 2,072 departments, ministries and agencies, along with 777 associated boards and commissions.

In total, subscribers have access to more than 17,000 organization profiles and over 25,000 contacts! Information on **Canada's Information Resource Centre (CIRC)** is available at [www.greyhouse.ca](http://www.greyhouse.ca).

Every effort has been made to assure the accuracy of the information included in this edition of the *Canadian Environmental Resource Guide*. We acknowledge the valuable contributions of those individuals and organizations that have responded to our information gathering process. Your help and responses to our questionnaires are greatly appreciated. Do not hesitate to contact us with comments, or with revisions if necessary.

# Canadian Environmentalists

## Mark Angelo

Born March 14, 1951 to Shirley Ann Richards and Edmond Angelo.

**Currently:** Writer, speaker, and river conservationist. Founder and Chair of BC Rivers Day and World Rivers Day

**Career:** Prior to 2009, Angelo was the head of the British Columbia Institute of Technology's (BCIT) Fish, Wildlife and Recreation Program. In 2009 he became the inaugural of the BCIT's River Institute. He retired from BCIT in 2011. His conservation work has included leadership in river conservation and restoration initiatives, such as Guichon Creek in Burnaby and the broad initiative to protect the "Heart of the Fraser." From 2003 to 2007 he hosted the *National Geographic* online program *Riverworld*. The program was followed up by "Wild Water, Wild Earth" in 2008. He has been a subject of documentaries including *RiverBlue* (2016), which documented Angelo's three-year journey around the world by river, and *Last Paddle; 1000 Rivers, 1 Life* (2021), which documented his worldwide efforts in conservation and restoration. He was also the lead subject of an ABC 10 investigative story in 2017 travelling along the Tijuana River from Mexico into California documenting pollution issues. He continues to support and mentor new and established river conservation groups.

**Awards:** He has received honorary doctorates from both Simon Fraser University (2009) and Trent University (2019). He is a member of the Order of British Columbia and a Commander of the Order of Canada. He is also the namesake for Angelo Creek in Burnaby, BC since 2012. Recipient of the Barsby Award from the BC Wildlife Federation in 2014. Member of the Fraser River Hall of Fame. Named one of Canada's 100 greatest modern day explorers by *Canadian Geographic* magazine in 2015. He is a fellow of the Explorers Club and the Royal Canadian Geographical Society.

**Books:** *The Little Creek that Could; the story of a stream that came back to life* (2021).

## Michael Bailey

**Currently:** Executive Producer at Planetviews International, based in Honolulu, Hawaii.

**Career:** Bailey is a graduate of Al Gore's The Climate Project training program and is currently an authorized presenter for the program. In addition to his documentary film work, Bailey was an official observer at the International Whaling Commission and has been involved in anti-whaling and dolphin protection initiatives, as well as other environmental and wildlife conservation programs. He supervised the original *Rainbow Warrior*, flagship of Greenpeace. He was formerly the Director of Operations at The Climate Summit.

**Contact:** Planetviews International, #100-147, 758 Kapahulu Ave., Honolulu, Hawaii, USA 96816; Phone: (415) 484-8343; e-mail: conservation@planetviews.com

## Maude Barlow

Born May 24, 1947.

**Currently:** Chair of Food and Water Watch, based in Washington, DC; Chancellor of Brescia University College in London, ON; and a councillor of the World Future Council, based in Hamburg, Germany.

**Career:** Barlow served as Senior Advisor on Water to the 63rd President of the United Nations General Assembly, 2008-2009. She is the co-founder and former Chair of the Blue Planet Project, a global initiative with a

focus on securing the right to water, and sustainable solutions to the water crisis. She is also the former Chairperson of The Council of Canadians for three decades, a citizens' advocacy group with chapters across the country.

**Books:** Barlow has authored or co-authored numerous books and reports, including the bestseller, *Blue Covenant: The Global Water Crisis* (2009), as well as *Boiling Point: Government Neglect, Corporate Abuse, and Canada's Water Crisis* (2016) and *Whose Water is it Anyway? Taking water protection into public hands* (2019). Her most recent book is *Still Hopeful: Lessons from a Lifetime of Activism* (2022).

**Awards:** Recipient of fourteen honorary doctorates from Canadian universities, most recently from Mount Saint Vincent University in Halifax, in 2016. Barlow was also granted the 2005 Right Livelihood Award, the Citation of Lifetime Achievement at the 2008 Canadian Environment Awards, and the 2009 Earth Day Canada Outstanding Environmental Achievement Award. She is featured in Sam Bozzo's documentary film *Blue Gold: World Water Wars*, and is the subject of both the National Film Board's documentary *Democracy à la Maude* (1998) and a CBC TV *Life and Times* biography, "Immovable Maude: The Life and Times of Maude Barlow" (2001).

**Contact:** Food and Water Watch, 1616 P St. NW Washington, DC, USA 20036; Phone: (202) 683-2500; Toll-Free: (855) 340-8083; e-mail: info@fwwatch.org; URL: www.foodandwaterwatch.org

## Kehkashan Basu

Born June 5, 2000, in Dubai, India

**Currently:** Founder and President of Green Hope Foundation; Co-Chair of the SDGs Student Advisory Committee at the University of Toronto; Co-Lead and Youth Leader, Feminist Action for Climate Justice Action Coalition, UN Women Generation Equality Forum; Councillor at the World Future Council; National Geographic Young Explorer.

**Career:** Basu started her environmental activism at age 8, planting trees and teaching other children how to recycle. She was the youngest delegate to speak at the UN Nations Conference on Sustainable Development in 2012. Also in 2012, Basu founded the Green Hope Foundation, which conducts conferences and workshops around the world on the implementation of the UN's Sustainable Development Goals (SDGs), including engaging youth globally in community projects aimed at promoting sustainable energy and consumption, climate justice, and conservation, as well as gender equality and other social justice causes. Basu received her Bachelor of Arts in Environmental Studies from the University of Toronto, with minors in Women & Gender Studies and Physical & Environmental Geography. In 2024, Basu completed her Master's of Business Administration with a focus on Sustainable Global Enterprise from the Cornell Johnson Graduate School of Management. Basu was a Youth Ambassador for the World Future Council from 2012-2020, when she became a Councillor. She is also currently active with the World Humanitarian Forum, the Apple International School in Dubai, and is a member of the Board of Trustees for the Parliament of the World's Religions.

**Awards:** International Children's Peace Prize, 2016; UN Human Rights Champion, 2016; named one of Canada's Top 25 Women of Influence in 2018; Voices Youth Award, 2020; named one of Forbes 30 Under 30 in 2021; World Literacy Award for Significant Contribution

to Literacy by a Youth, 2021; Meritorious Service Medal of Canada, 2022.

**Contact:** URL: www.thegreenhopefoundation.org; Twitter: twitter.com/KehkashanBasu; Instagram: www.instagram.com/kehkashan5basu; LinkedIn: www.linkedin.com/in/kehkashanbasu

## John Bennett

**Currently:** Senior Policy Advisor, Friends of the Earth.

**Career:** Bennett served as executive director at Sierra Club Canada from 2007-2015, and in various capacities since 1998. While a student at the University of Toronto, he was instrumental in establishing the Toronto office of Greenpeace. After working as a newspaper reporter for ten years, Bennett returned to Greenpeace in 1989, and also worked with Pollution Probe. In 1994, he was in charge of Belleville Green Check, which conducted energy audits on area homes. He played a role in opposing a coal-fired power plant at Point Aconi, Cape Breton. Bennett also headed the national Climate Action Network. He served as Communications Director for the Green Party of Canada and has worked closely with party leader Elizabeth May.

**Contact:** Friends of the Earth Canada, 1404 Scott St., Ottawa, ON K1Y 2N2; Phone: (613) 241-0085; URL: foecanada.org

## Tzeporah Berman

Born February 5, 1969, in London, ON.

**Currently:** Berman, an active and controversial figure in the Canadian environmentalist movement, currently functions in a strategic advisory capacity for numerous environmental, First Nations, and philanthropic organizations engaged in clean energy and issues related to oilsands and pipelines. Such roles include International Program Director at Stand.earth & Chair of the Fossil Fuel Non-Proliferation Treaty Initiative.

**Career:** Berman's earliest activity as an environmental organizer began in the early 1990s, during the Clayoquot Sound anti-logging protests; her role as a central figure in organizing and promoting the demonstrations led to the then-Premier labeling her "an enemy of the state"—and to her arrest under 857 counts of criminal aiding and abetting. After shifting her efforts from forestry to climate change, Berman was named by the Premier of British Columbia to the Green Energy Advisory Task Force in 2009. Berman has founded and served in senior positions with a number of Canadian and international environmental organizations, acting as Co-Director at Greenpeace International's Global Climate and Energy Program; as Executive Director and Co-Founder at PowerUp Canada, which targeted key federal ridings in an effort to mobilize voters around climate change; and as Co-founder and Campaign Director of ForestEthics (now Stand.earth), a group that informs consumers about the environmentally harmful business practices of large corporate suppliers. In 2015 she was appointed to the BC Government Climate Leadership Team in order to help BC meet its climate targets. Berman has also served as a designer for promotional campaigns for Greenpeace International, for the Volkswagen campaign in Europe, and for the Clean Our Cloud campaign, the latter of which pushed Apple and Facebook to adopt renewable energy resources to power their data centres. She was also an Adjunct Professor in York University's Faculty of Environmental Studies.

## Recent Environmental Events

### 2022

#### July

- The Government of Canada released its 2030 Emissions Reduction Plan, which aims to reduce emissions in Canada to 40% below 2005 levels by 2030, and to net-zero by 2050, providing a path and goals for each major sector.

#### September

- The financial cost of 5 severe storms, classified as catastrophes, in July and August in Western Canada is totaled at over \$300 million in insured damages. Damages were incurred from severe thunderstorms, high winds and several tornadoes.

#### November

- The Ontario government announces plans to develop 2,994 hectares of land in 15 different areas of the province's protected Greenbelt zone, while compensating for the loss by adding 3,804 hectares elsewhere. However, it is determined that proposed developers of this land are in many cases also the owners of the land, and that there are direct connections with government staff. By September 2023, new regulations are announced to not only return the affected land to the Greenbelt, but also to codify the boundaries of the Greenbelt, meaning future changes would have to go through the Ontario legislature.

#### December

- As of December 20, Canada bans single-use plastics for manufacture and import for sale. The ban is put into effect to achieve a goal of zero plastic waste by 2030. The ban includes plastic items such as cutlery, food service wares, checkout bags, stir sticks and straws, etc.
- Global leaders of more than 190 countries make a deal, called the Global Biodiversity Framework, to protect and restore 30% of the world's natural areas, including oceans, by 2030 at the Biodiversity Conference COP15 in Montréal. The agreement includes the redirection of hundreds of billions of dollars in subsidy funds from environmentally harmful industries to the combat of species extinction.

### 2023

- 2023 was Canada's most destructive wildfire season ever recorded with 18.5 million hectares of land burned, and with occasions where nearly every province and territory had wildfires burning. The wildfires persisted through 3 seasons of 2023. By June 27, the historic record for total land area burned in Canada had been surpassed.
- 2023 had the warmest recorded summer in Canada in 76 years, with all but the Atlantic provinces recording their 5 warmest months on record from May-September. Temperatures over 30 degrees Celsius were recorded for Eastern Canada even in April and October. It also recorded the hottest ever marine heatwave in Canadian waters.

#### January

- In January and February, the polar vortex results in temperatures up to 15 degrees colder in Western Canada than average.

#### April

- A major storm hitting Ontario and Québec results in mass power outages across both provinces, affecting some residents for 3 days.

#### June

- Wildfire smoke in Canada affects not only Canadians, but more than 100 million Americans and even air quality in Greenland, Iceland and other European countries. Edmonton launches its first extreme weather response due to extremely poor air quality, cancelling outdoor excursions and implementing indoor recesses for schools. Montréal records the worst air quality in the world due to wildfire smoke on June 25.
- The federal government launches its National Adaptation Strategy. Developed over 2 years in consultation with national and provincial organizations, Indigenous communities, youth, the private sector, provincial and territorial governments, NGOs, and adaptation experts, it provides a national strategy for climate change adaptation. It offers a shared direction across 5 major systems: health and well-being, disaster-resilience, infrastructure, nature and biodiversity, and economy and workers. It includes \$1.6 billion in funding for assisting communities faced with climate-change-related risks, from deadly heat waves to wildfires and floods.

#### July

- The most powerful tornado in Alberta since 1987 is recorded near Didsbury as an EF4, resulting in destroyed homes, a gas leak, downed power lines; there was only one injury.

#### August

- The federal government announces its draft Clean Electricity Regulations, which is designed to help Canada reach its goal of a net-zero electricity grid by 2035. These regulations will meet the need for decarbonizing the grid as well as increased electricity demands. It leaves the technological aspects up to each province, enabling each to determine which kinds of energy generation solutions are the most suitable for its needs. Final regulations are expected to be out in 2024.

#### October

- Prime Minister Justin Trudeau announces new energy affordability package for rural Canadians, to reduce costs associated with heating. The package includes an increase in the Climate Action Incentive Payment and 3-year pause on the federal pollution price on deliveries of heating oil, a savings up to \$250 on average. In addition, measures to be piloted first in Atlantic Canada are announced to switch from oil heating to heat pumps, making the average heat pump free for low-income households. The switch is estimated to save families up to \$2,500 per year in home energy costs.

## Summary for Policymakers

Scientists across the world have provided new evidence and understanding of the environmental challenges that we face at global, national, and local levels. They have documented how the build-up of emissions — including air pollution, effluent flows into waterways, mismanaged waste, chemical releases, and greenhouse gas emissions — harms human health and ecosystems. Of particular note, the recent Sixth Assessment Report from the Intergovernmental Panel on Climate Change makes clear the urgent need to address the threat of climate change.

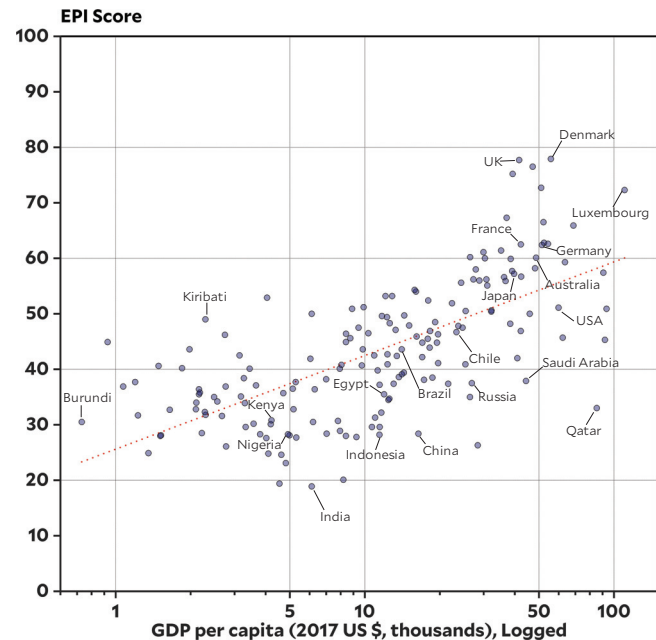

Carefully constructed and methodologically rigorous environmental indicators allow us to track trends, identify emerging pollution problems, gauge the success of policy interventions, and ensure that our investments in environmental protection offer the greatest returns possible. Data-driven metrics promise to enhance environmental decision-making and steer the world towards a more sustainable future — but only if policymakers embrace fact-based analysis and act on the insights that emerge from the data.

The 2022 Environmental Performance Index (EPI) offers a data-rich sustainability scorecard that translates cutting-edge scientific findings into policy insights. Using 40 performance indicators, the EPI ranks 180 countries on their national efforts to protect environmental health, enhance ecosystem vitality, and mitigate climate change. These indicators measure how close countries are to meeting internationally established sustainability targets for specific environmental issues. While the overall EPI scores provide a way to spotlight sustainability leaders and call out laggards, the accompanying disaggregated data offers a more refined tool for identifying policy weaknesses and anomalies, as well as proven programs that countries can adopt from their top-performing peers.

With a methodology refined over two decades that builds on the most recent data, the EPI enables decision-makers to recognize the drivers of top-tier performance. Analysis of the EPI data demonstrates that financial resources, good governance, human development, and regulatory quality matter for elevating a country's sustainability. Highlighting these connections, the EPI helps to promote sustainable development in support of a more environmentally secure and equitable future (Figure PS-1).

### Leaders and Laggards

High-scoring countries exhibit longstanding and continuing investments in policies that protect environmental health, preserve biodiversity and habitat, conserve natural resources, and decouple

**Figure PS-1.** EPI scores are correlated with country wealth, although some countries outperform their economic peers while others lag.

greenhouse gas emissions from economic growth. Denmark tops the 2022 rankings — an achievement rooted in strong performance across nearly all issues tracked by the EPI, with notable leadership in efforts to promote a clean energy future and sustainable agriculture. The United Kingdom and Finland place 2<sup>nd</sup> and 3<sup>rd</sup>, both earning high scores for slashing greenhouse gas emissions in recent years.

Lagging its peers, the United States places 20<sup>th</sup> out of 22 wealthy democracies in the Global West and 43<sup>rd</sup> overall. This relatively low ranking reflects the rollback of environmental protections during the Trump Administration. In particular, its withdrawal from the Paris Climate Agreement and weakened methane emissions rules meant the United States lost precious time to mitigate climate change while many of its peers in the developed world enacted policies to significantly reduce their greenhouse gas emissions.

Innovations in the EPI methodology continue to shed light on new environmental issues and identify worrying trends — especially as data coverage improves in the developing world. Based on the latest scientific insights and environmental data, India ranks at the bottom of all countries in the 2022 EPI, with low scores across a range of critical issues. Deteriorating air quality and rapidly rising greenhouse gas emissions pose especially urgent challenges. Many bottom-tier countries face war and other sources of unrest as well as a lack of financial resources to invest in environmental infrastructure.

# Trade Shows, Conferences and Seminars

Conferences, seminars, & trade shows are listed by year, month, & day for 2024 and beyond. In cases where only a year was provided, the entry appears at the end of that year. Listings include association annual general meetings, government-sponsored events, industry trade shows, & international meetings. Changes do occur; you are encouraged to verify dates & locations before planning to attend.

Listings may include:

- date
- name of event
- location (facility, city, province, country)
- sponsor / host organization
- scope of the meeting
- description of the event, if available
- contact for the event

Full details on Canadian organizations sponsoring events or conferences may be found on Canada's Information Resource Guide (CIRC) online.

## 2024

### January

#### 2024 ROMA Annual Conference

Date: January 21-23, 2024

Location: Sheraton Centre Hotel  
Toronto, ON

Sponsor/Contact: Rural Ontario Municipal Association

#801, 200 University Ave.

Toronto, ON M5H 3C6

# Intergovernmental Offices & Councils

## Arctic Council

Global Affairs Canada, 125 Sussex Dr., Ottawa ON K1A 0G2  
Tel: 613-995-1874

e-mail: [media@international.gc.ca](mailto:media@international.gc.ca)  
URL: [www.arctic-council.org](http://www.arctic-council.org)

### Chief Officer(s):

Mathieu Parker, Director of the Secretariat  
[mathieu.parker@arctic-council.org](mailto:mathieu.parker@arctic-council.org)  
+47 913 91 486

Robert Sinclair, Senior Arctic Official (Canada)

[Robert.Sinclair@international.gc.ca](mailto:Robert.Sinclair@international.gc.ca)

**Description:** Intergovernmental forum for addressing common concerns & challenges by the member states of Canada, Denmark (including Greenland & the Faroe Islands), Finland, Iceland, Norway, the Russian Federation, Sweden & the U.S. Its objective is to be a regional forum for sustainable development mandated to address environmental, social & economic issues. The scientific work of the Council is carried out in six expert working groups focusing on such issues as monitoring, assessing & preventing pollution in the Arctic, climate change, biodiversity conservation & sustainable use, emergency preparedness & prevention. The six working groups are: Arctic Contaminants Action Programme; Arctic Monitoring & Assessment Programme; Conservation of Arctic Flora & Fauna; Emergency Prevention, Preparedness & Response; Protection of the Arctic Marine Environment; & Sustainable Development Working Group. The Council meets every two years; the secretariat rotates among the member states.

## Canada-Newfoundland & Labrador Offshore Petroleum Board (C-NLOPB)

#7100, 240 Waterford Bridge Rd., St. John's NL A1E 1E2  
Tel: 709-725-2900

e-mail: [information@cnlopb.ca](mailto:information@cnlopb.ca)  
URL: [www.cnlopb.ca](http://www.cnlopb.ca)

Social media: [twitter.com/CNLOPB](https://twitter.com/CNLOPB)

### Chief Officer(s):

Scott Tessier, Chief Executive Officer

Jeff O'Keefe, Chief Conservation Officer & Director, Resource Management

Elizabeth Young, Director, Environmental Protection

**Description:** The Canada-Newfoundland & Labrador Offshore Petroleum Board manages the petroleum resources in the N.L. offshore area on behalf of the Government of Canada & the Government of N.L. The Board's authority is derived from the legislation implementing the 1985 Atlantic Accord between the two governments. The Environmental Protection department ensures that offshore oil & gas industrial activities proceed in an environmentally acceptable manner & evaluates the effect of the offshore environment upon the safety of offshore activities & by ensuring protection of the environment during the conduct of these activities. Working in close consultation with the Operations & Safety departments, Environmental Protection assesses the effects of environmental conditions, such as winds, waves & ice conditions, in the N.L. offshore area upon the safety of operations. Environmental Protection reviews operators' plans for collecting the weather, oceanographic & ice data that they are required to measure at offshore drilling & production sites. The Board reviews proposals for all physical activities offshore to identify their potential effects upon the natural environment or upon other users of that environment, such as the fishery. It evaluates measures that are proposed to prevent or mitigate these effects. This activity includes reviewing operators' contingency plans for environmental emergencies, especially oil spills, to ensure there are adequate response measures.

## Canada-Nova Scotia Offshore Petroleum Board (CNSOPB)

#27, 201 Brownlow Ave. Dartmouth, NS B3B 1W2  
Tel: 902-422-5588; Fax: 902-422-1799

e-mail: [info@cnsopb.ns.ca](mailto:info@cnsopb.ns.ca)  
URL: [www.cnsopb.ns.ca](http://www.cnsopb.ns.ca)

Social media: [twitter.com/CNSOPB](https://twitter.com/CNSOPB)

### Chief Officer(s):

Christine Bonnell-Eisnor, CEO

Kris Kendell, Director, Resources & Rights

Dena Murphy, Director, Operations / Health, Safety & Environment

**Description:** CNSOPB is responsible for protection of the environment during all phases of offshore petroleum activities,

holding similar responsibilities. Working groups are: Contaminated Sites; Cumulative Effects; Environmental Emergencies; and Water Guidelines.

from initial exploration to abandonment. The Board is a Federal Authority under the Canadian Environmental Assessment Act. The environmental assessment process starts at the Call for Bids stage. At this stage, a strategic or broad environmental assessment is conducted which identifies environmental concerns or issues. All subsequent projects, including seismic programs & exploratory wells, must undergo an environmental assessment prior to approval by the CNSOPB. The Board also uses class screenings or generic assessments to streamline the regulatory process. These more in-depth environmental assessments, usually jointly funded by a number of petroleum companies, provide more detailed overviews of potential environmental effects, research priorities & mitigation measure than can be accomplished in a single project-specific environmental assessment. Applications from the petroleum industry for work authorizations must include an environmental assessment, environmental contingency plan & spill contingency plan. The Board consults with FEAC on environmental & fisheries-related matters. The Board is also involved in initiatives led by the Department of Fisheries & Oceans (DFO) related to marine protected areas & integrated management planning under the Oceans Act. The Board has signed memorandums of understanding with both the DFO & Environment & Climate Change Canada.

## Canadian Council of Forest Ministers (CCFM) / Conseil canadien des ministres des forêts

c/o Canadian Forest Service, Natural Resources Canada, 580 Booth St., 11th Fl., Ottawa ON K1A 0E4

e-mail: [NRCan.CCFM-CCMF.RNCan@Canada.ca](mailto:NRCan.CCFM-CCMF.RNCan@Canada.ca)

URL: [www.ccfm.org](http://www.ccfm.org)

### Chief Officer(s):

Hon. Jonathan Wilkinson, Minister, Natural Resources Canada  
[HonJonathan.Wilkinson@nrcan-mrcan.gc.ca](mailto:HonJonathan.Wilkinson@nrcan-mrcan.gc.ca)

343-292-6837

Michael Vandergrift, Deputy Minister, Natural Resources Canada  
[michael.vandergrift@nrcan-mrcan.gc.ca](mailto:michael.vandergrift@nrcan-mrcan.gc.ca)

**Description:** The Canadian Council of Ministers (CCFM) was established in 1985 to give sufficient attention to forest issues. CCFM stimulates the development of policies & initiatives for strengthening the forest sector, including the forest resource & its use. It provides leadership, addresses national & international issues & sets the direction for stewardship & sustainable management of Canada's forests. The CCFM is composed of the fourteen federal, provincial & territorial ministers responsible for forests. The CCFM undertakes activities primarily through ad hoc fora, committees & working groups. CCFM core initiatives include: Climate Change; Wildland Fires; Forest Pests; Innovation; & Forest in Mind. National Forestry Database Program: [nfdp.cfm.org](http://nfdp.cfm.org); National Forest Information System: [nfs.org](http://nfs.org).

## Canadian Council of Ministers of the Environment (CCME) / Conseil canadien des ministres de l'environnement

#360, 123 Main St., Winnipeg MB R3C 1A3

Tel: 204-948-2090

e-mail: [info@ccme.ca](mailto:info@ccme.ca)

URL: [www.ccme.ca](http://www.ccme.ca)

### Chief Officer(s):

Hon. Bernard Davis, President

Krista Nazimek, Executive Director

[knazimek@ccme.ca](mailto:knazimek@ccme.ca)

204-948-2172

**Membership:** CCME is comprised of the environment ministers from the federal, provincial and territorial governments. These 14 ministers normally meet at least once a year to discuss national environmental priorities and determine work to be carried out under the auspices of CCME. The Council seeks to achieve positive environmental results, focusing on issues that are national in scope and that require collective attention by a number of governments. CCME aims to assist its members to meet their mandate of protecting Canada's environment. CCME serves as a principal forum for members to develop national strategies, norms, and guidelines that each environment ministry across the country can use. CCME is not another level of government regulator, but a council of government ministers

holding similar responsibilities. Working groups are: Contaminated Sites; Cumulative Effects; Environmental Emergencies; and Water Guidelines.

## Canadian Intergovernmental Conference Secretariat (CICS) / Secrétariat des conférences intergouvernementales canadiennes

PO Box 488, Stn. A, Ottawa ON K1N 8V5  
Location/Deliveries: 222 Queen St. 12th Fl., Ottawa ON K1P 5V9

Tel: 613-995-2341; Fax: 613-996-6091

e-mail: [services@scics.ca](mailto:services@scics.ca)

URL: [scics.ca](http://scics.ca)

Social media: [twitter.com/cics\\_info](https://twitter.com/cics_info)

### Chief Officer(s):

Ruth Onyancha, Secretary

Benoît Massé, Acting Assistant Secretary & Chief Financial Officer

**Description:** CICS was established in 1973 by the First Ministers as an agency of the federal & provincial governments. Governments recognized a need for a mechanism to serve on a continuing basis, conferences of First Ministers & a growing number of intergovernmental meetings. CICS serves federal-provincial First Ministers' meetings, the Annual Premiers' Conference, the Eastern Canadian Premiers' & New England Governors' Conference & the Western Premiers' Conference. The core of the Secretariat's work is providing services to multilateral meetings of Ministers & Deputy Ministers in virtually every sector of government activity. The Secretariat's services are available to federal, provincial & territorial departments that are called upon to organize & chair such meetings. The agency's mandate & sole program are designed to relieve its clients of the numerous & various technical & administrative tasks associated with the planning & conduct of senior level intergovernmental conferences. The CICS maintains through its Information Services section, a document archives (including audio-visual & photographs) for the use of governments & the general public. The information contained in the archives is made available, as appropriate, to government institutions at the federal, provincial & territorial levels while unclassified material is also available to the public on request.

## Commission for Environmental Cooperation (CEC) / Commission Coopération Environnementale

Secretariat, #1620, 1001 boul. Robert-Bourassa, Montréal QC H3B 4L4

Tel: 514-350-4300; Fax: 514-350-4314

e-mail: [info@cec.org](mailto:info@cec.org)

URL: [www.cec.org](http://www.cec.org)

[www.linkedin.com/company/commission-for-environmental-cooperation-of-north-america](https://www.linkedin.com/company/commission-for-environmental-cooperation-of-north-america)

### Chief Officer(s):

Jorge Daniel Taillant, Executive Director

[jdtailant@cec.org](mailto:jdtailant@cec.org)

Orlando Cabrera-Rivera, Unit Head, Environmental Quality

[ocabrera@cec.org](mailto:ocabrera@cec.org)

Armando Yáñez Sandoval, Unit Head, Green Growth

[ayanez@cec.org](mailto:ayanez@cec.org)

Lucie Robidoux, Unit Head, Ecosystems

[lrobidou@cec.org](mailto:lrobidou@cec.org)

**Description:** The Commission for Environmental Cooperation (CEC) is an international organization created by Canada, Mexico & the United States under the North American Agreement on Environmental Cooperation (NAAEC). The CEC was established to address regional environmental concerns, help prevent potential trade & environmental conflicts & to promote the effective enforcement of environmental law. The Agreement complements the environmental provisions of the North American Free Trade Agreement (NAFTA).

## Conference of New England Governors and Eastern Canadian Premiers (NEG/ECP)

Council Secretariat, PO Box 2044, #1006, 5161 George St., Halifax NS B3J 2Z1
